A little bit **ABOUT R²**

The Residence Collection is a leader in the development of cutting-edge upvc window and door systems, driven by a commitment to technology and innovation. At the pinnacle of the collection, is Residence² (R²) - The aluminium alternative, a design masterpiece that combines sleek, modern lines with exceptional performance.

R² is built to unquestionable market-leading design standard, this effective and high performance system offers clean lines and advanced functionality. An elegantly flush sash exterior and a unique square interior give R² its bold and modern appearance. All glass sightlines are perfectly equal providing symmetry, complementing the internal stylish square detail.

R² not only oozes design appeal but boasts superior performance. With its 9 chamber design, R² accommodates the most thermally and acoustically efficient triple and double glazing, attaining u-values as low as 0.8 W/m²K with triple glazing, reaching passivhaus requirements and 1.2W/m²K as standard with double glazing. The frame is 100mm front to back, offering 28mm double or 44mm triple glazing options with 3 bead aesthetics (decorative, square or staff*), as well as dedicated door sashes for open-in and open-out options.

"The architectural highlight with clean lines & superb performance"

**Special order only*
