

Box Section

Dimensions	10×10 mm to 150×150 mm
Wall Thickness	1 – 5 mm
Applications	Framing, railings, modular structures
Properties	High rigidity, clean geometry, corrosion-resistant

Angle

Types	Equal and unequal angles
Sizes	15×15×1 mm to 100×100×10 mm
Applications	Corner reinforcement, brackets, edge trims
Finish Options	Powder coated, anodized, mill finish

Tube

Shapes	Round, rectangular, oval, flat
Dimensions	Ø6 mm to Ø219 mm
Applications	Handrails, structural supports, ventilation frames
Properties	Seamless or welded, lightweight, durable

Bespoke Profiles

Customisation	Tailored cross-sections for unique design requirements
Integration	Compatible with curtain walling, cladding, and fenestration systems
Applications	Architectural detailing, shading systems, structural trims
